

# What is 1:1 or one-to-one computing?

Put simply, one-to-one computing means a device for every student.

A 1:1 scheme allows you to move technology out of the traditional ICT suite and directly into the hands of each individual learner, so they're empowered to achieve more.

Edutech are the premier provider of 1:1 parent contribution schemes, putting technology into the hands of students and empower them to educational excellence.

Edutech believes that no child should be left behind and part of our process is to address

the inequalities faced by disadvantaged children and give them access to the same opportunities as other students.

The last few years has meant there is a greater demand for technology lead learning, online lessons, teaching aids, new content to engage and capture student attention which together with parent participation has changed the education landscape forever.

The pace of change has been dramatic with some schools struggling to meet student

demands and with little or no budget to provide students with their own iPad, Chromebook, or Laptop it has become imperative that schools look outside of the traditional funding models to do so.

Formed in 2010 Edutech has managed hundreds of 1:1 parent contribution schemes will manage yours so you can focus on teaching!

## Parent ordering portal

We provide a school branded ordering portal and hosting for the term of the scheme. Our 256-bit encrypted portal (same as internet banking) manages the end-to-end parent ordering process including direct debit, pupil premium, free school meal and multi academy trust management without the need to have different portals for different student groups or multiple schools within a large trust.

**Importantly all our systems are owned and operated by Edutech Zone Ltd in the UK, we do not outsource any of our systems or processes.**

## Real-time management reporting

Our comprehensive real-time management reporting provides IT, finance, and business managers with up-to-date scheme information at the touch of a button.

Our reporting includes scheme set up, parent orders and approvals, a detailed financial breakdown of each element of the scheme as well as monthly direct debit management reports.

For IT we also capture device serial numbers, insurance, and warranty claims data.

To book your free 20-minute on-line demo please use the form on our website, call or email us using the details below.

# Fully managed service

We make no charge for our services - all costs are included in the parent contribution model.

There is **no admin or set up fees** for our education operating lease services and our accidental damage and or theft insurance has no excess, so you can be assured your school parents receive the best value for money.

To book your free 20-minute on-line demo please use the form on our website, call or email us using the details below.

## Integrated direct debit management

Our parent direct debit collection services are administered by us so parents do not have to contact a third party when they need to change the date of their direct debit or have financial questions.

## Support to school and parents during ordering window

Our support team is available Monday to Friday 8am to 8pm, Saturday 10am to 6pm and Sunday 11am to 4pm and can deal with a variety of admin and general assistance requests.

We're often asked to contact parents with English as a second language or require technical assistance including during out of office hours and weekends where we answer questions and provide the information needed before completing the sign- up process with them.

## Pupil premium, free schools meals and sibling support

Within our systems we can set up real time automated discount codes to assist schools in providing all students with the same opportunity to take part in the scheme irrelevant of their economic background or circumstances.

## Management and set-up of insurance and warranty

Set up and management of insurance and warranty policies and claims processes.

## Procurement management

While we do have our own supplier network that schools can take advantage of, on occasion we've been asked to manage a small tender process to ensure best value practices are followed and we do this by engaging with our own and school suppliers before presenting our findings for the school to make the final decision.

## Operating lease and agreement set up

Management and creation of Education operating lease documents and ongoing management of this process.

## Multi-academy trusts

For multi-academy trusts our systems can manage multiple schools on one portal allowing our real time reporting to be provided at a trust level with a detailed breakdown by school name.

## Continued support and development

Our approach to supporting our schools and parents is core to what we do. Our support team works with parents every day, from managing direct debit enquiries and insurance claims to assisting parent to place orders, often working late in the evening or weekends making sure all parents have an opportunity to take part.

As well as the detailed real-time management reporting we work closely with schools and hold regular reviews of current and planned schemes, technical updates and input into our system functionally so that as technology evolves, we continue to improve the service we offer.
